

# Let's get visual.

Illustrated videos plus linked assessment items that support teaching and learning

Essential Sciences  
Nursing School Courses  
Exam-style Questions

Built to support a variety of curricula, our rapidly-growing library of 550+ videos aids your students throughout their nursing school journey, from fundamental videos like physical assessments to graduation with topics like leadership and research.

## On-demand content at your students' fingertips

The screenshot displays a video player for the topic 'Rheumatic heart disease: Nursing Process (ADPIE)'. The video content includes a diagram illustrating the pathogenesis of rheumatic fever, starting with Streptococcus pyogenes, leading to an immune response, inflammation, and tissue destruction. The interface features a sidebar with 'CLIENT REPORT', 'PATHOLOGY', and 'SUMMARY REVIEW' sections. A video player at the bottom shows a progress bar and a transcript. On the right, there are sections for 'Videos' (listing related topics like CAD and hypertension), 'Assessments' (with a 'Start' button), and 'Review Questions'.

Students learn visually and control what comes next

Practice questions linked to learning objectives

Video chapters allow for bite-sized learning

Content accessible to all via closed captioning

Quickly scan video transcripts to sync with learning objectives

Watch videos at the speed that works best for you

## Meet Our Nurse Educator Content Creation Team
