
MyClass is designed to simplify the process of sharing class materials with your students. It allows you to easily collate JoVE Playlists and Quizzes and seamlessly distribute them among your students via a Class.

With MyClass, you can centralize your course materials and track your students' engagement with the materials in the Class. We believe that MyClass will help you create a more efficient and effective teaching experience for both you and your students

❖ How to access & create a Class on the JoVE platform?

1) Log in to your JoVE account.
2) Click on the **Education** dropdown on the header and select **My Classes (BETA)** submenu to navigate to MyClass landing page

3) On the MyClass landing page click on the **Create new Class** button
4) This will open up an overlay to fill-in details for the new class.
5) After filling in the necessary details click on the **Create new Class** button on the overlay

5) The newly created class will start appearing under the **My Classes** section - Eg: **Test Class**
6) A JoVE Curriculum Specialist can also create and share a class with you, which you can see listed under **Draft Classes** - Eg: **Demo Class 2**

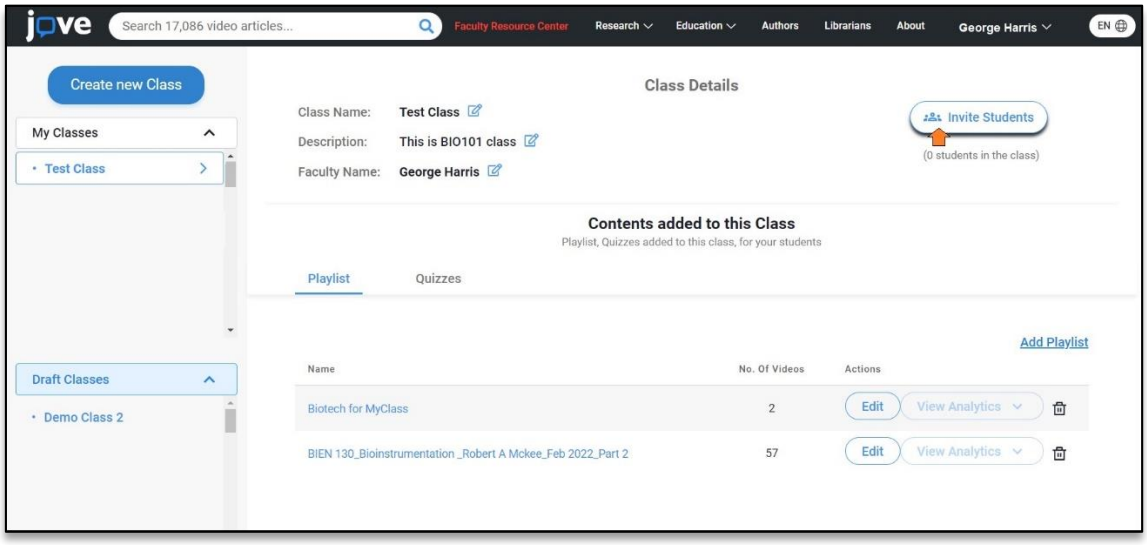
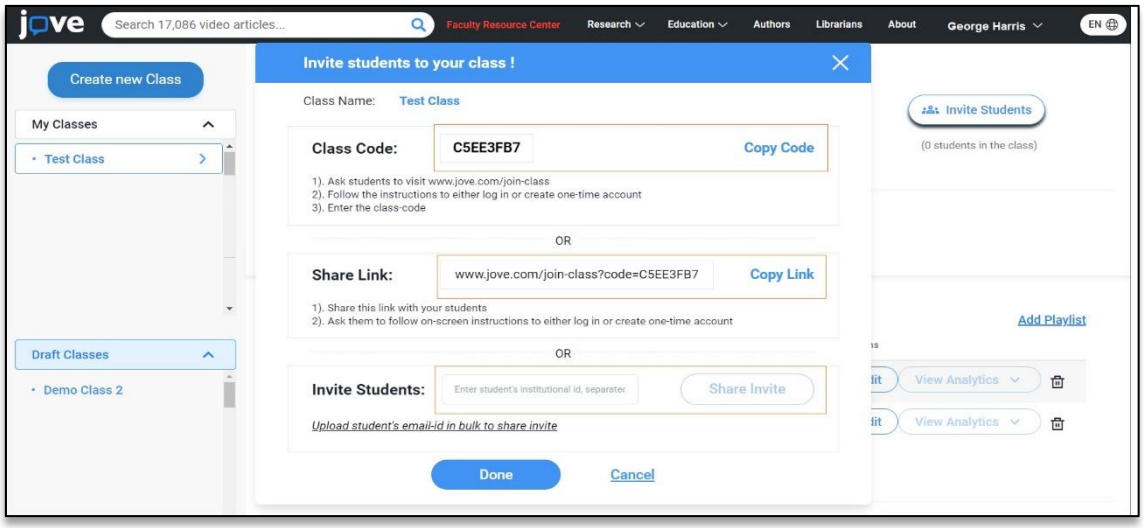
❖ How to Invite Students to a Class on JoVE platform?

1) The pre-requisite to invite students to a class is to have atleast one playlist or quiz added to the class. **The Invite Students** button remains inactive in an empty class.
2) Once you have added a playlist or a quiz, the **Invite Students** button will be enabled.

3) Click on the **Invite Students** and an overlay will appear
4) You can find three different ways in which you can invite students to join your class





❖ How can Students join a Class on JoVE platform?

1) Students need to Log-in to their JoVE account and click on **Join Class button** on the header. This button appears only for a student profile.
2) On the next screen student can enter the **class code** and click on **Proceed**.
3) On the subsequent screen student will be asked to confirm the class before joining
4) Once the student confirms by clicking on **Proceed**, he/she will be able to successfully land inside the class and watch the videos or take quizzes.

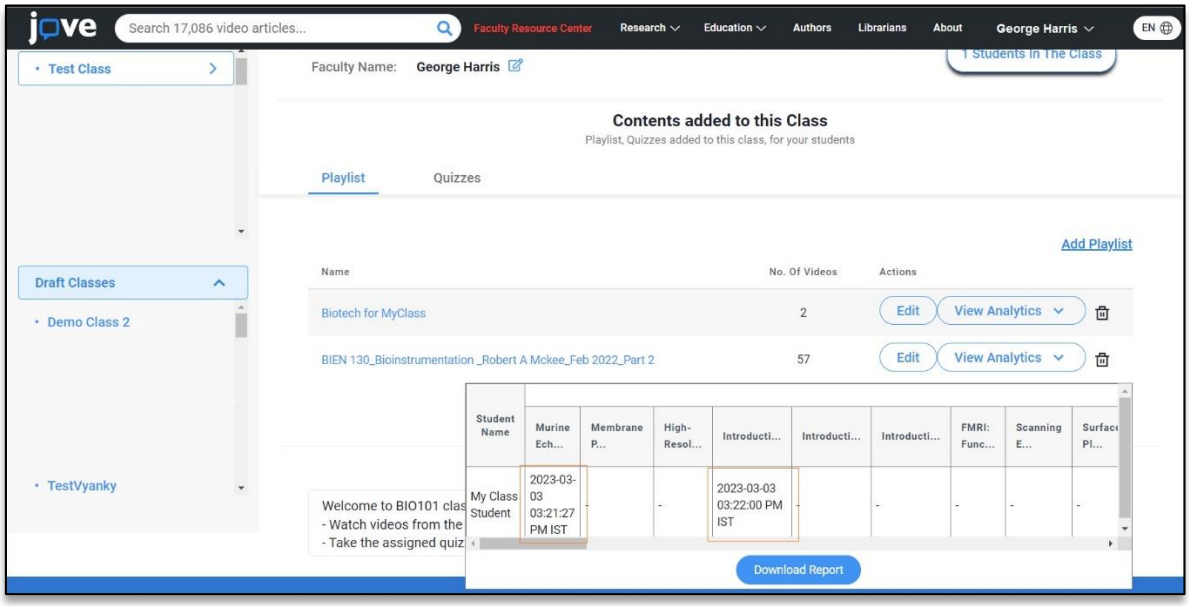
❖ How faculty can view analytics in a Class on JoVE platform?

1) The **View Analytics** button will be become active once atleast a Student has watched a video in that playlist.
2) Click on the **View Analytics** button to see which student has watched which video.


3) The report will show the date when the student watched the video for the first time.
4) You can download the complete report for better readability
