Stronger together: Team-oriented medicine

To keep up with cutting-edge research and an ever-changing medical landscape, medical staff today must work together to efficiently and effectively deliver a high standard of care. Today, patients are diagnosed and treated by teams of physicians, nurses, and healthcare professionals from such specialties as imaging, pathology, surgery, and internal medicine. As clinical care becomes more complex and specialized, this collaboration and communication across disparate disciplines will only become more commonplace.

Springer's *Medicine eBook Collection* is designed to provide clinically relevant information to all members of the patient-care team, an integral part of delivering first-rate, comprehensive care.
