### Use continually updated clinical content to jumpstart your patients' journey to good health

Pediatricians guide and foster the physical, emotional, and social health of children from birth to young adulthood. As part of this, you play an integral role in diagnosing and treating everything from infectious diseases and respiratory illnesses to common ailments and everyday injuries. But your patients are changing rapidly, and free online sources and summary information alone simply won't empower you to effectively care for who they are today and who they'll become tomorrow.

With ClinicalKey, you'll have comprehensive answers from authoritative sources, including renowned journals in your field, ensuring that your decisions and treatment plans reflect the latest evidence—and remain in your patients' best interest throughout every stage of their young lives.
